About us!

VOGEL Antriebstechnik stands for innovative and reliable engineering in gearbox construction for industrial applications. Our products are convincing with their high level of precision, durability and high power density. Our strengths are the wide product portfolio with a comprehensive modular range of almost all types of gearbox, as well as maximum flexibility no matter the requirements and fast realisation of customized solutions.

Company. Stability through innovation.

Wilhelm Vogel GmbH is a medium-sized, owner-managed family business and has stood for sophisticated, innovative drive technology for more than 70 years. We develop and market high-quality, durable precision gearboxes, drive systems and custom solutions for industrial applications. Our range extends from classic machinery gearboxes through compact technology for coaxial and right-angle applications to its own high-precision servo gearboxes.

Philosophy. New paths for our customers.

Continuity and development are mutually dependent cornerstones of our corporate tradition. For around 70 years we have dedicated ourselves to customers, products and the market with a maximum of quality consciousness. With our developments, we are actively shaping the future of gearbox engineering. As a high-performing development and technology partner, we want to significantly increase the efficiency of customer plants with our high-quality gearboxes and unique drive solutions. We are thus pursuing the main objective of securing our customers' performance and success on the global market and expanding it long term.

Commitment. Dedicated to keeping our finger on the pulse of time.

Customers benefit from a team of excellently qualified employees that takes a passionate and energetic approach to new challenges. We are often the first to go down new paths in order to achieve new product solutions for our customers.

Fast responses. Simply because we can.

Well-oiled processes, experienced employees, state-of-the-art technology and a continuous optimisation process guarantee fast implementation from receipt of order to delivery.

Customer relations. Your requirements - our problem-solving expertise.

For us, good customer relations are the basis of long-term partnerships. Efficiency and safety from initial project discussions through to the finished product and beyond – that is the objective of our quality management and service management campaigns. First, we provide thorough and customized advice on your application. Once the ideal solution is decided upon, we produce flexibly and on schedule, precisely in tune with your manufacturing processes.

Innovative strength. Process to Success.

We are close to customers, familiar with the current market requirements and use these to develop new technical solutions for our customers. Our open corporate culture supports these processes with straightforward exchange between all levels and short decision-making paths. At the same time, our hands-on mentality permits fast decisions and thinking outside the box for new ideas. This is indisputably based on the high level of experience provided by our employees and their unusually strong identification with the company.

A career at VOGEL. Welcome to the team.

Are you qualified and committed? We are always on the look-out for more motivated employees - as managers, skilled specialists, school-leavers or students. Plan your next career step with VOGEL. We at VOGEL Antriebstechnik look forward to meeting you.

Global. Wherever our customers are.

In more than 40 countries. On all continents. Internationally, our customers are supported by our distribution and service partners. This means we are present on the important markets and provide access to our range of competences and products the world over. In Germany, we guarantee after-sales support through central spare parts supplies and service coordination in Oberboihingen.

Innovation and tradition for 70 years

In 1946 Wilhelm Vogel founded the company Wilhelm Vogel GmbH in Oberboihingen as a metalworking company. As soon as in 1950, the focus was already on gearwheel production, mainly for standard bevel gears. When the production of in-house developed helical bevel gearboxes started in 1965, the foundation stone was laid for global success and complete concentration on gearbox engineering. Today, with one of the most comprehensive gearbox ranges from a single source, VOGEL Antriebstechnik stands for precision, innovation and top product quality.
