

# Customer-specific solutions

From the standard gearbox to a customer-specific drive

[Home](#) / Customer-specific solutions

Whether minor application-specific adaptations are required on the basis of our product range or complete custom solutions. You will get exactly the gearbox you are looking for from us. Do you need a certain shaft? A special drive flange? Or an ATEX gearbox? This is how flexible we are: With you, we look for a cost-optimised custom solution that is as good in every way as our standard products in terms of quality and efficiency. Make the most of our product flexibility, which we can provide thanks to our leading position in customer-specific development.

- Combination of standard products
- Standard products with customer-specific adaptations
- Completely customized solutions

We provide reliable consultation and design a purpose-built gearbox for you – including gearwheel production
