Contact: Mr. Philipp Renz

The new catalogue for Industrial Gearboxes is now available.

Following publication of its "Servo Gearboxes" catalogue, VOGEL Antriebstechnik has now extended its new series of catalogues by the product range "Industrial Gearboxes". With its clearly structured layout and handy format, the 160 page catalogue offers a quick overview of the wide range of products available.

The Industrial product range from the Oberboihingen-based gearbox specialists is based on 8 ranges grouped into planetary gearboxes, bevel planetary gearboxes, spiral bevel gearboxes and bevel helical gearboxes.

The new Industrial catalogue allows both existing and potential customers to benefit from a comprehensive work of reference that can be used to find the optimum industrial solution quickly and reliably.

The VOGEL Industrial catalogue is available now in German and English and can be requested from info@vogel-antriebe.de.

The catalogue can also be viewed online or be downloaded from www.vogel-antriebe.de.
